

Securus, Inc. Proudly Sponsors National Campus Safety Summit Organized by Lehigh University and Security on Campus, Inc.

Sept 29th Summit Will Bring Together Campus Security Leaders

Cary, NC (September 23, 2011): Securus, Inc., title sponsor of the summit, is preparing for this week's "Proceeding in Partnership: The Future of Campus Security" summit, presented by Lehigh University and Security on Campus, Inc. In preparation for the event, Securus announced today that it plans to present one of the company's eClick personal emergency locators to all panelists as a token of appreciation for leadership across campus safety initiatives.

eClick is the premiere prevention tool for attacks and violent assaults on college campuses. It fits in a student's pocket or a purse and enables students to instantly and discreetly connect with campus police in an emergency with a press of the SOS rescue button. eClick uses GPS, Cellular Triangulation and WiFi hotspots to quickly and accurately pinpoint users' locations indoors and outdoors. Compared to dialing 911 with a cell phone, eClick sends alerts six times faster and is ten times more accurate in determining a user's location.

"We believe that one valuable tool used to help keep a campus safe is technology, and learning from participants and Security on Campus, Inc. in summits like this one will spur meaningful innovation. We are proud to be sponsoring this important summit and to meet campus security thought leaders," said Chris Newton, CEO of Securus. "We are excited to offer summit panelists our eClick GPS Locators, a product we developed with campus police and college administrators, to improve students' safety on and off college campuses."

At the summit, which takes place during National Campus Safety Awareness Month on Lehigh's Mountaintop Campus, the country's most prominent thought leaders on campus safety will come together to discuss the critical issues facing colleges and universities. Panel discussions will include sexual violence, alcohol and other drug abuse, emergency response and off-campus safety.

Securus, Inc. has recently developed a unique, comprehensive security system designed specifically to improve safety on college campuses. The system includes the eClick GPS Locator and CatchAThiefGPS, a GPS locator used by campus police across the country to catch thieves and reduce property theft.

About Security On Campus, Inc. (SOC):

Security On Campus, Inc. was founded in 1987 by Jeanne Clery's parents, Connie & Howard, after she was raped and murdered in her on-campus residence hall at Lehigh University by a fellow student whom she did not know. SOC worked to secure passage of the Jeanne Clery Act, originally known as the Campus Security Act, in 1990 and continues to be the nation's leading voice for the improvement of campus safety. SOC was recently named the "most influential security focused not-for-profit" by Security Magazine. SOC is based in King of Prussia, Pennsylvania. For additional information on SOC call 610-768-9330 or go to www.securityoncampus.org.

About Lehigh University:

For 146 years, Lehigh University (www.lehigh.edu) has combined outstanding academic and learning opportunities with leadership in fostering innovative research. The institution is among the nation's most selective, highly ranked private research universities. Lehigh's four colleges – College of Arts and Sciences, College of Business and Economics, College of Education and the P.C. Rossin College of Engineering and Applied Science – provide opportunities to 7,000 students to discover and grow in a learning community that promotes interdisciplinary programs with real-world experience.

About Securus, Inc.:
